

DISHES AND THEIR ALLERGEN CONTENT - [The Punchbowl Hotel]

We at The Punch Bowl Hotel handle ingredients containing allergens and the following is listed for each dish in this chart. Although great care is taken there is a potential risk of cross contamination. Customers with special dietary needs should state their requirements at the time they place their order to allow our staff to take all reasonable precautions to avoid cross contamination.

The allergy information is accurate on the day stated on the allergen matrix but may change at any future time. Customers must check the Food Allergy matrices each time they visit our restaurant, before placing their order just in case any of our ingredients have changed.

The information concerns only intended ingredients of menu items and does not include any customisation to a menu item (e.g. adding toppings to a burger). Any customisation should be checked against the Food Allergen Matrixes and with a member of the management team before ordering.

Please Note:

Our Fries are cooked in the same oil as gluten, meat and fish products & is 100% Soybean oil.
